

EM Series

3-5kW | Single Phase LV Hybrid Inverter

The GoodWe EM Series bi-directional energy storage inverter can be used for on-grid PV systems, with the ability to control the flow of energy intelligently. During the day, the PV array generates electricity which can be provided either to the loads, fed into the grid or charge the battery, depending on the economics and set-up. The stored electricity can be released when the loads require it during the night. Additionally, the power grid can also charge the storage devices via the inverter. An all-round intelligent system for maximum energy flexibility.

Smart battery management function

50A charge & discharge capacity

Export control (Zero export)

IP65 dustproof and waterproof

<10ms UPS-level switching

Fanless design, long lifespan

*1: The actual charge and discharge current also depends on the battery.

*2: Maximum operating dc voltage is 530V.

*3: For VDE-AR-N4105&NRS 097-2-1, GW5048-EM is 4600.

*4: Can be reached only if PV and battery power is enough.

*5: CAN communication is configured by default. If 485 communication is used, please replace the corresponding communication line.
